

Financial Accounting and Reporting Services

As financial and regulatory reporting becomes increasingly complex and dynamic, many carriers struggle with finding, training, and retaining accounting staff with appropriate skills and experience to maintain their overall accounting process.

Highly skilled staff with extensive industry experience with STAT, GAAP and IFRS reporting

Inpoint provides comprehensive financial accounting and reporting services to (re)insurance companies to support their business objectives. Inpoint offers a full suite of consulting and outsource services.

- Specific consulting services to supplement your existing reporting and accounting processes
- Financial, managerial and compliance reporting including regulatory filings (data calls) and preparation of statutory financial statements
- General ledger maintenance including all ledger entries, accruals, and reconciliations
- Accounting for insurance operations, investments, and regulatory reporting
- Treasury operations including cash management, cash accounting, and accounts payable
- Automated processing for the residual market pools (i.e. FAIR, CAIP, NCCI)

Provide scalability and fractional resources during your peak busy season for a cost effective solution

Inpoint provides resource flexibility to meet the demands of the carrier's monthly, quarterly and year-end accounting processes. Inpoint's ability to provide shared resources on a fractional basis provides carriers with a more cost-effective solution to match resource needs with the appropriate skill levels.

About Inpoint

Inpoint is the leading global management consulting firm focused exclusively on the insurance and reinsurance industry. As a trusted advisor with unmatched experience in strategy, claims and operations, we deliver credible and practical solutions to empower our clients' financial performance.
