

Christopher Iovino, CSP, ARM

Managing Director, Global Risk Consulting

Experience

Based in New York, Chris' current responsibilities include the management of the US casualty risk control practice and coordination of Aon's global risk control services. Some of his team's specialties include ergonomics, fleet, product risk, environmental consulting and safety culture solutions. The team's focus is on the identification of pre and post loss mitigation strategies for major corporations that impact their Total Cost of Risk. With Chris' global access, he is able to offer distinctive client value with the utilization of Aon's global risk control resources and leverage prior successes delivered in "like industries".

Chris brings a specific financial focus to the development of pre and post loss strategies, seeking to identify and implement solutions that represent both economic and cultural opportunities. Chris is a co-founder of Aon's Safety Culture Improvement (SCI) process, a behavioral and systems based safety approach that identifies cultural and systematic barriers to successful risk management programs and develops strategies for reducing overall cost of risk. Aon's Ergonomics Team also delivers solutions from a financial, operational and efficiencies perspective. Chris' specific industry engagements have included manufacturing, assembly, transportation, media, hospitality, retail and agribusiness.

With Aon since 1996, Chris has held positions in the Mergers and Acquisitions Group specializing in casualty risk control and portfolio risk management solutions, was a risk control team leader, a director of Global Risk Consulting focusing on project management for Global 1500 clients and led the US Business Development team before his return to the casualty risk control discipline.
