

Power Insurance and risk management overview

Aon is committed to offering innovative risk solutions to the challenges that the power industry faces around the world. We work closely with our clients to ensure that their insurance and risk management approach is as efficient and cost effective as possible

Aon's Power team has over 200 dedicated power generation and utility specialists worldwide with comprehensive knowledge of the regulatory, financial, technological, environmental and geographic aspects of global power generation. Combining these specialists ensures our clients enjoy Aon's full range of insurance and risk management services.

Our international expertise enables us to understand the complexities of the power and utility industry worldwide. We use this knowledge to support our clients in this ever evolving industry.

Power sector knowledge

With expertise in all areas of power generation including fossil fuels, sustainable and renewable energy and nuclear power, we help clients identify, manage and mitigate risk exposures in an efficient and cost effective way.

By combining our skills with a comprehensive analysis of a client's risk tolerance, we can provide a clear assessment of the total cost of risk a firm or project faces.

Global presence, local relationships

Our worldwide presence allows us to provide dedicated local service to your operations, backed by global power and utility resources and expertise.

The benefits of combining and applying our extensive technical knowledge to our global portfolio of power clients are substantial. These include the provision of accurate peer benchmarks, development of new markets as well as the creation of new products and services. It also gives us the ability to increase competition and minimise cost, and control the claims process to ensure swift and fair settlement.

Client focused

We provide expert support throughout the life-cycle of a project.

During the development phase we assist with finance agreements and negotiations with lenders or joint venture partners, give advice relating to insurability and provide accurate, bench-marked cost estimates.

Throughout construction we offer advice on the intricate mix of project risks and combine our experience with our global placement hubs to develop bespoke coverages for each project.

Comprehensive and cost effective covers for the operational period are carefully dovetailed with the construction insurances. In addition, our clients benefit from a wide range of services such as loss control and ongoing risk management advice.
