Protecting People, Property and Structures

Over the next decade, companies, institutions and governments will invest more of their time and capital in security than at any time in our history. Natural disasters, acts of terrorism, crime, infrastructure failures and other security challenges present significant risks—every day, and in every corner of the world.

Aon is a complete security solutions provider. Our experts apply knowledge gained from decades of planning and designing secure facilities throughout the world. We understand the range of security risks, and stay current on available methods, technologies and equipment to anticipate and solve these risks.

Project Types

Aon’s Global range of security experience encompasses all types of facilities, including:

- Chemical Facilities
- Commercial Buildings
- Corporate Headquarters/Campus
- Correctional Facilities
- Data Centers
- Educational/Campus Environments
- Entertainment/Casino Venues
- Government Buildings
- Health Care Facilities
- Heavy Industrial Facilities
- High-Rise Buildings
- Hotels/Resorts
- Historical Facilities
- Military Bases
- Mining
- Museums/Galleries
- Petrochemical Plants
- Residential Buildings
- Retail Malls
- Super Towers
- Telecommunications Facilities
- Tunnels and Subways
With Owners, Developers and Property Managers, we assess site-specific vulnerabilities and apply best practices in security planning, design and implementation, based on decades of experience in the field. Aon’s security experts stay current on all new technology and systems, adapting and continuously improving to meet current and future threats.

With Architects, we collaborate to intuitively address security risks through design process. With early involvement and a consultative approach, Aon partners with you from design development through construction. Design aesthetics are preserved, and urgent security issues such as life safety, entry management and door hardware are addressed early in the design phase. We are known for rapid responsiveness and constant communication with project architects and design teams.

With Security Directors and Risk Managers, we are trusted advisors and a continuous resource for needs large and small. From reviewing and validating the need for security to providing innovative solutions to meet budgets, our knowledge of technology and best practices provides practical answers. We review and benchmark every aspect of security operations, equipment, policy and training to protect the assets and integrity of the organization while increasing return-on-investment.

Aon’s knowledge of risk management, loss prevention, life safety and security provides a one-stop solution for preserving your organization’s investments.
Services

Security Assessment, Needs and Analysis
• Benchmarking & Organizational Analysis
• Budget Review & Recommendations
• Country Assessment
• Feasibility & Cost Analysis
• Loss Prevention Surveys & Audits
• Security Master Planning
• Technology Needs Assessment
• Vulnerability & Threat Assessment

• Security Systems Performance Review
• Workplace Violence Consulting
• Benchmarked Cost Analysis
• Security Training
• Policy & Security Procedure Development
• Emergency Preparedness Plans
• Operations Planning
• Advanced Travel Assessments

Systems Design, Bidding and Construction
• Programming & Conceptual Design
• Force Protection Design
• Technical Specifications & Design Drawings
• Surveillance Systems
• Access Control & Alarm Monitoring Systems
• Bid Procurement
• Construction Administration
• Construction Documents: All Design Phases

Specialized Services
• Crime Prevention Through Environmental Design
• Crisis Management & Emergency Response
• Determined Aggressor Assessments
• Minors on Campus Assessments
• Organizational Benchmarking
• Technology Integration Consulting
• Workplace Violence Training
• Violence Incident Prevention (VIP) Assessment
Choosing Aon

The Aon security team works with clients to understand the unique challenges and opportunities presented by every project. Our company provides approachable, responsive and consultative team members who are continuously leveraging innovative tools, technology and best practices for your project’s benefit.

Among the reasons clients select Aon as a trusted security consulting partner:

**Experience**
Aon enjoys a reputation built on decades of trust, quality work and client satisfaction. We approach security in a holistic, comprehensive way, by examining a range of scenarios and developing practical, insightful and innovative solutions.

**Integrity**
We are not affiliated with equipment manufacturers or installation companies, allowing Aon to develop a sound relationship built on trust. Our interests and fiduciary obligations are straightforward: meet client needs, minimize risk and reduce costs.

**Vision**
Our teams are skilled in seeing what exists today, then envisioning the needs and potential risks likely to arrive tomorrow. We apply this skill towards long-term solutions which provide tangible return on dollars invested.

**Global Reach**
We are able to apply our resources and knowledge of local conditions, regulations and construction requirements on behalf of clients anywhere in the world. Aon’s security consulting services and teams reach every corner of the globe.

**Company Strength**
We are part of Aon Corporation, the world’s leading risk management service provider. Aon provides a seamless set of risk management services: crisis management, fire protection engineering, loss prevention, code consulting and life safety services.

**Knowledge Leadership**
Aon consultants are recognized as leaders in the field, in part because we are involved in setting industry standards and benchmarking best practices. Our participation with professional and technical associations in the global security industry is what sets us apart.
