

Winning the War for Tech Talent with Aon Choice

Recruiting and retaining top talent remains a major challenge in today's increasingly competitive business environment, particularly in the information and communications technology industry. The Canadian information technology industry alone employs over one million Canadians directly and indirectly across the country (source: <http://itac.ca/our-industry-our-profile/>). Your budget and resources are finite, and with employees seeking greater choice in benefits and ease of access to benefits programs, it can be a struggle to find a cost-effective solution.

Did you know?

- Nearly 1/3 of employees view their base pay and benefits as below market
- One in three employees are looking to switch jobs in the next year
- Employees don't think their rewards are competitive
- Employees are five times more engaged when total rewards are viewed as competitive
