

AVIATION/AEROSPACE

NationsPLUS™ Aviation/Aerospace, offered by Aon Reed Stenhouse Inc., provides insurance solutions to service the diverse areas of the aviation industry, both for commercial and personal needs.

Aon is one of only a few Canadian brokers who specialize in the aviation industry. Our aviation group consists of more than 125 insurance specialists located in Canada and the United States. Our experts are dedicated to managing the unique risks associated with aviation exposures, and our relationship with insurers enables us to provide you not only with quality coverage but competitive rates. Access to leading aviation insurance markets ensures we provide with the best possible coverage available.

Private Aviation Insurance

Aon is one of the largest aviation insurance brokers and the broker of choice for many private aircraft owners.

Aon wants to ensure your coverage and premiums are to your satisfaction year after year. Our aviation group includes pilots and industry experts with years of experience in the insurance business. This strength, combined with our friendly and prompt service, continues to make us the first choice for many pilots across Canada.

Aon offers insurance solutions for the following privately owned aircraft:

- Fixed Wing
- Rotary Wing
- Hanger Insurance
- Balloons, Ultra lights, and Kit Built Aircrafts

Commercial Aviation Insurance

Aon is among the world's leading aviation and aerospace insurance and risk management experts. We are committed to bringing clients the most comprehensive risk management and insurance solutions possible, along with market intelligence and analytical services that span the entire scope of aviation activities through our global network of resources. We are uniquely qualified to customize, market, and service all aspects of domestic and international aviation-related business and insurance products including the following:

Airlines

Aon is recognized as one of the leading insurance brokers in Canada. Our clients include international airlines throughout the world and many of our nation's regional and charter airlines.

Aircraft Leasing

We provide specialized insurance coverage that takes into consideration the diverse needs of aircraft leasing companies with their continuous fleet movements.

Airports and Airport Services

Aon leads Canada's airport insurance market by providing risk management and the vast array of coverages required by airport operators, from major international airports to small private air strips.

Aviation Products Manufacturers

Aon is at the forefront of technological developments in the aviation and aerospace markets. We offer specific programs developed for individual aviation and aerospace products manufacturers, whether it is major airframes, component parts, or engines.

Fixed Base Operations

There are hundreds of fixed base operators throughout Canada who serve the aviation needs of the nation's general aviation fleet. Providing fuel, maintenance, charter services, ramp services, flight training, and other various operations requires specialized insurance needs, which are comprehensively understood by the professionals of Aon.

Helicopters

Due to the potentially high-risk environment in which helicopters operate, the insurance needs they require are unique to the aviation industry. Aon insurance specialists clearly understand the helicopter environment and can identify the needs of various operations.

Corporate/Industrial Aid Aircraft

Many corporations, both small and large, own their own aircraft which are usually flown by professional pilots for their company use. This area of industrial aid aircraft is a specialty at Aon as we are equipped to provide distinctive coverage for these corporate use aircraft.

Non-owned Liability

Non-owned aircraft liability coverage through Aon provides third party liability protection for companies which do not own their own aircraft and charter or rent from an aircraft operator. It also provides protection to aircraft operators who require use of another operator's aircraft.

Risk Management Services

Our advisors assess and monitor the various types of risks specific to the aviation industry, and can provide the specific insurance coverages need to protect against these risks
