

# Philippines Retirement Benefit Study 2020

---

The Aon Philippines Retirement Benefit Study 2020 is designed to help employers benchmark their approach to employee retirement benefit provision. 41 participants took part in our comprehensive study covering all aspects of retirement plan design.

## Headlines

Providing employees with support around financial wellbeing is an increasing trend and retirement is key in the formula for success.

## Prevalence of supplementary retirement plans

**44%** of participants provide only the statutory retirement benefit to their employees. Of this, **79%** are in the process of setting up a supplementary plan or may set one up in the future.

In line with the global retirement trend towards defined contribution (DC) plans, we observed, that where a supplementary retirement plan is provided:

- **66%** are DC in nature
- **34%** are defined benefit (DB) in nature

## Attracting and retaining talent

**The workforce in the Philippines is young and growing.** The largest group in the work force is the millennials, those aged 25 to 34\*. With the well-established Business Process Outsourcing industry and expected increase in headcounts (pre COVID-19), the talent war continues. The two key areas of retirement plan design in attracting and retaining talent are, contribution strategy and vesting schedule.

Under DC plans' employer core contributions range from **5% to 15% of monthly basic salary**. Employer matching contributions may also be provided but are less prevalent.

Under DC plans, the vesting schedule usually starts earlier than DB plans. Accrued benefits start to vest after **3 or 5 years of service**. Benefits become fully vested after as early as **4 years of service, up to 20 years of service**.

**The study also covers DB plan benefit accrual and vesting.**
