

# Compromise Assessment

State-of-the-art techniques that help uncover the bad actors and their traces in your network.

## The Need

Attackers can go undetected for months — or even years — in a network. It's critical to identify possible indicators of compromise to understand the impact and scope of an attack before the damage is done — or before you learn about a breach from a third party or the media.

## How We Help

We use state-of-the-art assessments to help unearth attack vectors, techniques and technology. Using our deep experience and sophisticated tool set, we rapidly collect, correlate and analyze vast amounts of endpoint and server status data artifacts and compare them with our behavioral indicators of compromise. This allows us to quickly identify patterns of activity associated with a variety of attack scenarios. Should one be detected, we activate our incident response teams.

## Why Us

### Skilled Threat Hunters

Over the last 15 years, we've responded to 90 percent of the highest profile breaches.<sup>1</sup> Our human talent, coupled with our set of proprietary tools and threat intelligence, enable us to assess your environment quickly and comprehensively.

### Customized Approach

All of our engagements are tailored to address your needs and, by balancing risk with business impact, they are designed to help you make practical, risk-prioritized decisions. We help executives, information security professionals, and boards remain industry-compliant, protect their most critical assets, continually improve their approach to risk throughout the cyber resilience lifecycle, and propel their organization forward.
