

Cyber Insurance

We sit at the intersection of risk and coverage to help protect your organization because cyber insurance is no longer just about a data breach.

The Need

Now, every company is a technology company. A cyber breach has the potential to interrupt business operations, supply chains, products, and beyond. It can also impact third parties such as clients, patients, or guests. Cyber insurance coverage is about the business impact of a cyber-related disruption to your organization.

How We Help

Our brokerage team understands the risks and how to arrange best-in-class coverage in an evolving market. It's not one-size-fits-all, so we team with you to create a custom cyber insurance policy fit for your organization. Your policy will take into account your cyber risk exposures and your need for coverage. We consider your security posture, your appetite for risk, and your existing portfolio of traditional property and casualty policies.

Why Us

We Are Cyber Risk Specialists

We partner with you to assess and understand your cyber risk and advise you on how to proactively manage it. We create a custom insurance policy, unique to your organization and designed to meet your needs.

If you have questions about your specific coverage, or are interested in obtaining coverage, please contact your Aon broker.
