

Security Strategy Development

Your organization needs to compete. You also need to ensure your security. We consider the entire enterprise when creating an actionable security vision and roadmap to help you drive your organization and prioritize spending at the right time and in the right places.

▶ The Need

As a security leader, you are under pressure. The demand to address wide-ranging risks and privacy concerns is intensifying. In an increasingly complex regulatory environment, cyber security cannot be an afterthought in any digital business initiative. But where should your budget be spent? An enterprise security strategy clears the confusion by drawing a roadmap that your executive team and board can understand and act upon.

▶ How We Help

We identify the right security programs to align with your threat profile, priorities and risk appetite. We go beyond the compliance and regulatory requirements. Our programs can vary in length from three to six months, up to three years. Components may include threat intelligence and analysis, vulnerability management, insider threat management, network and application security, cloud security, and third party risk management. We lay out clear objectives, priorities, and implementation strategies with the NIST framework. Our strategy is actionable – not just words on paper.

▶ Why Us

Risk Professionals

We are risk professionals and security practitioners. We have been in your role. Because of our years in the trenches, we make the right decisions and set the right priorities to help you meet your security needs. We are more than planners – we know how to execute.

Board and C-suite Communicators

We are skilled at translating cyber security risks to the C-suite and board. We make the complex understandable, quantify risk, and help secure budget to remediate.
