Aon Architect[®] Solution

Balance benefit costs and employee perception.

Do you consider your benefit plans an important part of your employee attraction and retention strategy? Would you like insight into how employees will perceive the relative value of different benefit offerings and changes to benefit plans? Large U.S. employers will spend \$10,000 per employee on health care benefits in 2019, but employees often overlook the true value of their health benefits.

Introducing Aon Architect,¹ an innovative and streamlined approach to plan design and contribution modeling. Aon Architect helps employers thoughtfully balance financial objectives and employee satisfaction.

Employer Health Plan Challenges

Employee job satisfaction has been constantly dropping over the last 20 years, with compensation and benefits among the top factors for the downward trend.

Employee trust in employers is at an all-time low, and onethird of employees are seeking to change jobs in the next year.

Medical costs continue to grow faster than inflation: 8.4% versus 3.1%.

We're here to empower results

To learn more about Aon Architect, please contact your Aon representative or email:

health@aon.com

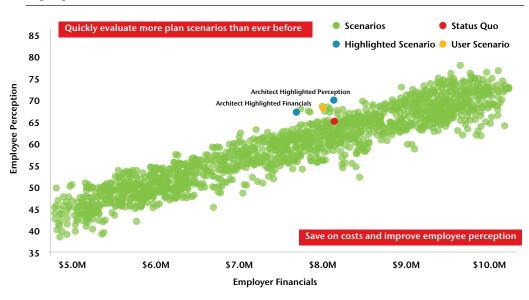

70% of employers say they are going to be revising their total rewards strategy to accommodate the changing needs and demographics of their workforces in the next five years.

CHROs and CFOs need to model a long-term benefits plan approach that incorporates both costs and employee perception.

Highlighted Scenarios Result

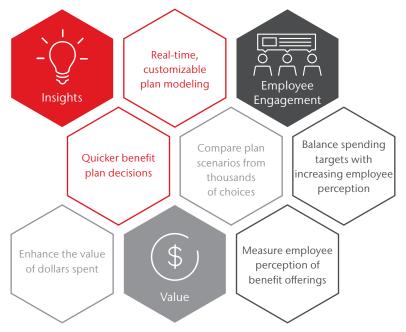

Balance Employee Perception and Health Care Costs

The current state of employee health care planning is complicated. As employers have complicated conversations about benefits, unexpected pivots come up and new questions require additional analysis – leading to extended timelines and missed deadlines.

Aon Architect facilitates these conversations, addresses core concerns and provides flexible and instantaneous analysis, which means the discussion can evolve in real-time. Aon Architect analyzes roughly 500,000 client-specific scenarios, and allows you to create and modify your own scenarios. The tool measures employee perception using proprietary data and advanced statistics, and uses machine learning to predict employee plan selection behavior. Many advanced tools come in a single package with Aon Architect.

Why Aon Architect?

Who Should Consider Aon Architect?

- Any size employer.
- Employers with self-funded plans.
- Employers with fully insured plans.
- Employers considering voluntary benefits.

A New Approach to Plan Modeling

- Immediate: Instant, custom plan modeling and detailed analysis.
- Insightful: Expand analysis to evaluate employee perception impact.
- Accessible: Efficient, reliable process available to all employers.
- Actionable: Save on costs and improve employee perception.
- Strategic: Data-driven results and recommendations.
