

Tabletop Simulation

Cyber Crisis Dress Rehearsal for Key Stakeholders

What is this service?

Aon Cyber Solutions experts roleplay a customised cyber threat simulation on your security program and IT infrastructure that mimics a real breach scenario specific to your industry.

How does it work?

In conjunction with your project team, Aon's cyber risk experts will develop a relevant scenario to workshop. Over a half-day, key stakeholders will work through the risk scenario as it plays out, developing a methodology for responding to cyber events. Aon's cyber risk experts will guide and facilitate the dialogue and decision-making process.

Why is it important?

Studies (e.g. Aon's Pentland Analytics reports) suggest that the impact of a cyber event on an organisation is largely dependent on its response. Threat simulations and tabletops not only help limit the impact of a breach once it happens but also can save money, minimise reputational damage, and help improve compliance and protections when it comes to sensitive data and intellectual property.

Why Us?

Top of the Game

Having spent over 15 years in global breach response and security, we're constantly learning about the latest techniques, cyber threats, and vulnerabilities that hackers exploit. On the back of that, we continuously update our simulations to reflect the latest threats.

Industry-Specific Knowledge

A team with in-depth knowledge specific to your industry and business will be assigned to you, so you can rest assured that we understand the challenges you face, and can hit the ground running.
