What is Integrated Pensions and how could it benefit me?

The world of pensions is changing all the time. We are increasingly finding that pension schemes are focusing on working towards a defined end game, one where your scheme becomes self-sufficient or is able to secure members' benefits in full.

Along this journey, you may work with a number of different advisors – or as is becoming more common, work with just one provider who can bring together all the key services you need. In a nutshell, this is Integrated Pensions.

At Aon, we believe that better outcomes are achievable for every pension scheme, no matter how big or small. You only have to look at our track record to see that's the case. Using analysis of our own clients, we can demonstrate that there is no discernible size factor in funding outcomes, consistent with our objective of

delivering better outcomes irrespective of size. Through our experience of working with pension schemes of all sizes and profiles, we can give you affordable access to the industry's most effective solutions – with absolute transparency over fees. Integrated Pensions is a simpler way of working. You will find a joined up and streamlined approach that is tailored to you, with just one senior point of contact. That means one person with absolute accountability for bringing together a team that is capable of delivering an outstanding service and meeting your long-term goals.

Risk Settlement

Integrating Risk Settlement within a scheme's long-term strategy will ensure that the bulk annuity market is accessed at the optimal time, and will deliver independence from the sponsor as early as possible.

From the very start, our Integrated Pensions team will work with you to identify and define your own unique objectives. That way we can ensure all advisors are working together and focused on achieving the same outcome.

Throughout your journey, Pensions Administration will ensure the necessary data cleansing and benefit specification is completed and your Investment Consultant will manage your asset allocation to ensure it is optimised for pursuing a strategic bulk annuity purchase as soon as it is beneficial to do so. To ensure you get the results you want, your Scheme Actuary will be there to make sure your funding target reflects your objectives, while monitoring your funding position in real time against the latest bulk annuity pricing.

This end-to-end process finishes with the transaction itself, following our tried and tested [Compass](#) process. Throughout every stage, we will leverage our position as market leaders to optimise the competitive tender process and secure better pricing and preferential terms.

This has led to the development of our [Implemented Consulting](#) solution, where we can step in on projects and handle some of the 'heavy lifting' for you. We are also developing how we support our clients when it comes to reviewing

alternative pension scheme governance options, such as sole trustees and DB Mastertrusts, as well as looking at emerging trends in this area.
