Unemployment Insurance Fraud

Quickly Identify and Prioritize Fraudulent Claims for Recovery

COVID-19 put millions of Americas out of work. The rapid increase and sheer volume of claims, both state and federal, resulted in billions of dollars in fraudulent unemployment payments being issued. Aon has brought together leading cyber solutions and deep public sector experience to develop a solution that helps state agencies quickly analyze, identify and prioritize fraudulent claims for recovery.

Proven forensic analytics yield simple, easy-to-implement results

Starting with multiple data sets, including state and federal unemployment insurance claim data, Aon applies advanced risk and recovery models to prioritize the best claims to investigate. We can determine which claims are likely fraudulent, and which claims provide the possibility for recovery.

Consultative support from experienced investigators

Starting with multiple data sets, including state and federal unemployment insurance claim data, Aon applies advanced risk and recovery models to prioritize the best claims to investigate. We can determine which claims are likely fraudulent, and which claims provide the possibility for recovery.

Performance-based pricing

Understanding the fiscal responsibility states have to their taxpayers, Aon is offering a performance-based model where payments are tied to funds recovered and cases escalated with a high likelihood of recovery.

Recovering Fraudulent Funds

| Collect all relevant data for analysis & enrichment | Apply advanced proprietary data analytics across all data | Identify, detect and investigate potential fraud | Escalate suspicious actors & transactions to pursue recoveries |

Aon's Public Sector Partnership

For over 40 years, Aon has supported public entities globally, including more than half of the US states, over a hundred large municipal governments, and dozens of the largest transportation and public utility authorities across the United States.

Aon's Public Sector Partnership (PSP) comprises a dedicated team focused on developing innovative solutions to help governmental entities and other public institutions strengthen cybersecurity resiliency, reduce budget volatility, and protect the delivery of critical programs, services and functions.
