Global Supply Chain Diagnostic
Global Supply Chain Diagnostic

Aon has developed a proprietary diagnostic tool to help risk leaders quickly assess the effectiveness of their supply chain risk management against more than a dozen critical supplier and enterprise exposures.

By completing a 15-minute online survey, risk managers can gauge how well their supply chains are protected against potential disruptions stemming from such exposures as natural disasters, cyber threats, political risk or terrorism, supplier insolvency, product integrity and reputational issues.

The diagnostic helps spot potential vulnerabilities that require immediate action or deeper assessment as well as areas where a firm applies a mature risk management approach.

Continual Improvement in Supply Chain Risk Management

Building on its successful Laser Diagnostics for Property and Casualty programs, Aon developed a high-level supply chain diagnostic tool. The tool provides clients with a fast, opinion-based assessment that can also help drive continual improvement in a firm’s supply chain risk management strategy.

While not an exhaustive review, Aon’s Supply Chain Diagnostic provides an objective assessment to help identify specific areas of relative strength in risk management and quickly spot aspects of a supply chain risk program that may need improvement. With this information, you can focus resources where they are most needed, saving time and money — a meaningful result.

Whether your firm is fully engaged in managing supply chain risks or just beginning the exposure evaluation process, completing the survey and reviewing the diagnostic can help strengthen your overall supply chain risk management.

The Supply Chain Diagnostic demonstrates Aon’s commitment to helping clients optimize total cost of risk in meeting critical growth and performance objectives. This is useful for risk managers, who are pressured to provide informed, timely perspectives on a spectrum of risks and expected to help drive strategic decision making.

Examining Supplier and Enterprise Risks

The diagnostic encompasses a wide range of exposures that relate specifically to suppliers, as well as enterprise risks that could represent supply chain vulnerabilities.

<table>
<thead>
<tr>
<th>Supplier Risks</th>
<th>Enterprise Risks</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Disruptions in supplies of raw materials or components</td>
<td>• Geopolitical events</td>
</tr>
<tr>
<td>• Natural disasters</td>
<td>• Legal and regulatory issues</td>
</tr>
<tr>
<td>• Operational Incidents</td>
<td>• Intellectual property theft</td>
</tr>
<tr>
<td>• Supplier insolvency</td>
<td>• Cyber-related exposures</td>
</tr>
<tr>
<td>• Product integrity</td>
<td>• Pandemics</td>
</tr>
<tr>
<td>• Unethical business practices</td>
<td>• Customer financial issues</td>
</tr>
<tr>
<td>• Product recall</td>
<td>• Transportation risks</td>
</tr>
<tr>
<td>• Product liability</td>
<td>• Country-specific political risk</td>
</tr>
</tbody>
</table>
Pinpointing Risk Management Strengths and Deficiencies

The Aon Supply Chain Diagnostic report includes a best practices dashboard that identifies key components of the major categories evaluated, expressed in terms of a “stoplight assessment.” Using this approach, green, yellow and red indicators identify areas where a specific issue or exposure may warrant further scrutiny:

- Green: Indicates maturity in the firm’s risk practices
- Yellow: Denotes a deficiency in one or more of its measures to manage a specific exposure
- Red: Flags a potential vulnerability to related loss

To add context to the findings, the Aon Supply Chain team, an Aon industry practice specialist and your account representative can offer their own perspectives on current marketplace realities. These are often relevant to a client’s operations and supply chain risk profile.

Leveraging Global Supply Chain and Industry Expertise

We provide the initial assessment of supply chain resiliency and risk management through the integration of informed risk management strategies derived from industry-specific best practices, as well as the expertise of Aon’s Supply Chain Practice.

The results from the diagnostic provide a framework for clients to benchmark improvements and changes to elements of their supply chain risk management against their own historical performance. We also help you compare results with our proprietary peer data and generally accepted insurance industry information.

A Full Range of Resources

Aon’s Supply Chain Risk Diagnostic is the latest innovation among a full range of tools and resources we provide to help clients in all parts of the world assess and manage global supply chain risk.

Effective Risk Transfer Combined with Sound Risk Management

Leveraging Aon’s global capabilities, our approach to supply chain risk combines risk transfer strategies with supply chain risk consulting and evaluation expertise. This is how we are able to identify and address concerns with your supply chain program.

Timely Response to Loss Events Worldwide

We recognize that, along with effective planning and preparation, a timely response to any supply chain outage is critical to our clients’ success. When and wherever needed, Aon’s global claims services can help clients respond rapidly to supply chain disruptions and obtain timely insurance recoveries to help minimize operational impacts and mitigate related financial consequences.
