

M&A Cyber Due Diligence

Customised Cyber Security Assessment of Target Companies

What is this service?

When merging with or acquiring a company, you also acquire their risks. We conduct cyber due diligence to identify potential threats to the value of your investment, giving you the insight you need to make sound decisions. Our experts go beyond a check-box due diligence assessment. With deep insights into the threat landscape today, we can help you to evaluate your investment for cyber risk vulnerabilities.

How does it work?

Pre-deal, we perform a cyber security assessment to help gauge risk. We assess your target's cyber risks and vulnerabilities while adhering to your deal time frame and creating a cyber risk profile that informs a 100-day, post-close remediation plan. Post-deal, we can assist with the implementation of remediation as a condition of closing or mitigate risk through deal-specific insurance products. When software is involved, we evaluate it for vulnerabilities.

Why is it important?

Cyber risks have emerged as a leading threat to private equity investments. Risks can include an insecure network, compromised assets, or risk for current or historical non-compliance. You need a risk assessment that goes beyond financials and evaluates your overall cyber security posture.

Why Us?

Beyond Traditional Due Diligence

We go beyond a check-box due diligence assessment. Our deep roots in cyber risk set us apart. We know the threat landscape and can confidently evaluate your investment for vulnerabilities. And we can assist with remediation and help secure your investment, delivering more than just recommendations.

Private Equity and Deal Expertise

With a team of senior cyber security consultants who have deep knowledge and skill in cyber risk protection and the deal management process, we are strategically positioned to understand the unique needs of private equity firms. We help ensure these firms take the appropriate actions to secure their investments and enhance returns across their portfolio.
