Webinar: Escrow accounts and pension scheme funding

22 October 2020

Escrow accounts are increasingly being used to manage pension scheme funding, whether to avoid trapped surplus, as additional funding security or to act as a funding mechanism for a specific aim (e.g. buy-out).

Given these developments, we have teamed up with leading advisers from **Eversheds Sutherland** and **Barclays Bank** to explore how escrow accounts work, the options available to employers and trustees, and insights on what they and we are seeing in the market.

The webinar will be of equal interest and relevance to trustees and employers given escrow structuring and its importance to achieving the end in mind.
