

Technology Corner Profile

Low productivity and a low digitization rate have sparked an influx of new technology being developed, which has the potential to make a profound impact on the risks involved on construction projects and within asset management such as safety risk and design risk. Aon understands that this trend may be of interest to our clients and has created the Technology Corner to profile different construction technology and asset management companies. Each profile gives an overview of the technology, addresses its risk treatment potential, and identifies what insurance policies its implementation could impact. Our goal is multi-faceted to raise awareness about leading construction and asset management technologies that could help reduce risk on site for the purposes of educating our clients and the insurance markets.

Product Description

Arrowsight provides hybrid Remote Video Auditing (RVA) and Artificial Intelligence technology and services utilizing inexpensive light weight portable cameras that help construction firms significantly reduce the risk of severe life changing injuries. After 15+ years of mass deployment in the food manufacturing sector and in healthcare, these services are now being made available to the construction industry.

Benefits

Key benefits associated with Arrowsight include:

Safety

Arrowsight's Remote Video Auditing & AI Workplace Safety solutions have helped reduce the highest risk injuries on Construction job sites by 90%+.

Productivity

Construction firms can improve productivity with RVA services by reducing recoverable lost time and optimizing their estimating process.

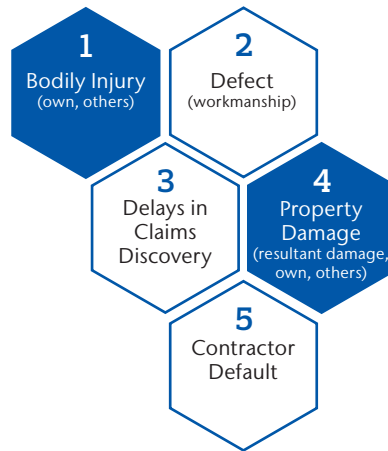

Cost Savings

Arrowsight clients have experienced a 90%+ decrease in high risk behaviors by workers, which reduces insurance claims costs and can provide clients with strong financial gains.

Risks Treated

Key risks mitigated by Arrowsight include:

Company Profile

Arrowsight, Inc.
2875 Route 35,
Katonah, NY 10536

CEO/Founder
Adam Aronson

Locations
New York, Alabama, India, EU

Impacted Insurance Policies

Insurance policies that will be positively impacted by Arrowsight:

- ▶ Wrap-up / Workers Compensation / Employer Liability
- ▶ Construction All Risk / Builder's Risk
- ▶ Default Insurance

Comments from the Founder

"After successfully providing hybrid Remote Video Auditing (RVA) and AI risk management services to the food manufacturing and healthcare industries for 15+ years, we were able to begin introducing these solutions to the construction industry two years ago once we were able to utilize light weight and inexpensive portable cameras. We have seen very strong initial results with highly regarded NY construction firm called Posillico Civil, who has been able to reduce high risk worker safety compliance rates from occurring ~50% of the time to occurring less than 5% of the time. As a result of using Arrowsight services to reduce these unsafe behaviors, Posillico has seen a sharp drop in insurance claims costs and has broadly expanded the use of our services to majority of their ~30 job sites. Being able to provide solutions that can have a direct impact on saving construction workers from severe life changing injuries is very gratifying to me and my company." — Adam Aronson, CEO/Founder
