

# Technology Corner Profile

Low productivity and a low digitization rate have sparked an influx of new technology being developed, which has the potential to make a profound impact on the risks involved on construction projects and within asset management such as safety risk and design risk. Aon understands that this trend may be of interest to our clients and has created the Technology Corner to profile different construction technology and asset management companies. Each profile gives an overview of the technology, addresses its risk treatment potential, and identifies what insurance policies its implementation could impact. Our goal is multi-faceted to raise awareness about leading construction and asset management technologies that could help reduce risk on site for the purposes of educating our clients and the insurance markets.

## Product Description

**StrongArm Technologies** is the industry leader in IoT enabled wearable sensors and data analysis. We capture physiological and environmental data on the bodies of Industrial Athletes using our FUSE risk management platform. We use the data collected to provide real time alerts to Industrial Athletes and help organizations to make better decisions around safety and productivity initiatives.

## Benefits

Key benefits associated with Strongarm include:

### Safety

FUSE provides real-time feedback to Industrial Athletes to prevent injuries and reports for managers to better understand the factors that contribute to injury.

### Productivity

FUSE allows organizations to monitor, assess and intervene with more speed, capability and accuracy creating a better working environment and increased productivity

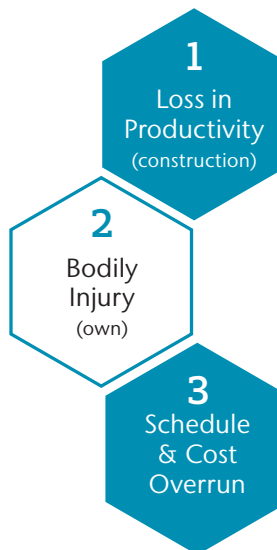

### Value

StrongArm delivers great value to clients in the form of more accurate risk assessments and safety recommendations that reduce injury and related workers comp costs

## Risks Treated

Key risks mitigated by Strongarm include:

### Company Profile

**StrongArm Technologies, Inc.**  
19 Morris Avenue,  
Brooklyn, NY 11205

**CEO/Founder**  
Sean Petterson

**Categories**  
IoT/Wireless Sensors,  
Artificial Intelligence

## Impacted Insurance Policies

Insurance policies that will be positively impacted by Strongarm:

- ▶ Construction All Risk / Builder's Risk
- ▶ Wrap-up / Workers Compensation / Employer Liability
- ▶ General Liability / Workers Compensation / Employer Liability

## Comments from the Founder

"Our technology is affordable, small and simple to use. My team is passionate and experienced at easy implementation and driving results. We focus on ensuring that the cost of the FUSE risk management platform is less than the enterprise value that it creates. And most of all, you can empower your team of Industrial Athletes to be Proud, Protected and Productive. That is why StrongArm exists." - Sean Petterson, CEO
